Read the passage and answer the questions given below.

## The Curious Milo

Milo, a curious rabbit, lived near a sparkling brook. Milo enjoyed hopping through fields and collecting colourful pebbles. One sunny afternoon, while digging near a tree root, he found an odd, shiny object. The magnifying glass was round with a handle. Milo held it up, astonished by how things appeared larger through it. He thought it was a magical window.

Excited, Milo rushed to show his discovery to his friends. They gathered around, peering through the glass, giggling at how big their noses looked.

Soon, an old wise owl flew down and explained to Milo and his friends that the magnifying glass helps to see tiny details. Milo realised how tools could reveal hidden wonders. From then on, he became even more eager to uncover secrets around his brook.
